

**CLUTCHTECH**

**TSB-309**  
**Flywheel Bolt Washers**

This kit is supplied with 6 crushable and serrated washers, pictured below. These washers can optionally be used for the flywheel bolts to provide additional security with bolt retention in the crankshaft, where they are prone to loosening under engine harmonics for some vehicles. It is highly recommended to use these washers, particularly if no other bolt locking mechanism is being used (other than thread locking compound).
