READ THIS BEFORE FITTING CLUTCH

Models applicable; Ford Cortina Mark I

Kits applicable; KFD19009

When fitting either a ClutchPro standard replacement clutch or an Xtreme to the Mark I Ford Cortina, the bearing spacer supplied must be fitted to thrust bearing carrier prior to installing bearing.

This is to retain the O.E. operating heights of the clutch.

Spacers are available from your ClutchPro Distributor

Part number: CFD19108-SP
